

Quoi ?

My task for my internship is to learn from Anthony Perrin, who is the project manager, and his team in the building and refurbishment of offices and meeting rooms for the Irish Stock Exchange in the centre of Dublin. My objectives are to help them in their tasks but surely to learn from their experience. Obviously I need to speak English so I learn about that too and I've also grown up personally as I've entered the world of work and all its side aspects.

Robin Vanderveken

Master 2 Sciences de l'ingénieur industriel orientation construction

Duggan Brothers Ltd Dublin, Irlande

EUROPE

Pourquoi ?

I had the opportunity to do an Erasmus+ again so I jumped at the chance. I wanted a country where I could speak and improve my English. So I first tried to go to a Scandinavian country but my research were unsuccessful. Speaking with my teacher I heard that Ireland wanted to be more present in the EU so I gave it a try and Duggan Brothers answered my request. And I was very pleased as I found out Ireland and Irish people are very welcoming!

Comment ?

It wouldn't have been possible if Mrs Besanger and Mrs Baras hadn't been there to take care of all the administration we need for the Erasmus+ program. I thank them greatly for all the work they do for us. I thank the Erasmus program to let me do a second exchange with their help. And finally to the Duggan Brother family to let me in one of their construction sites with the great welcome and advice they provided me with.
